Process technology packages for Bioethanol Plants

## Bioethanol Technology

### Optimizing your plant's performance

Revamps of existing facilities

- | Reduce utility consumption for low GHG emissions
- | Diversify feedstock
- | Increase capacity and yield
- | Improve product quality

### Partnering your process design

Process engineering for the bioethanol industry

- | Pre-engineering of process plants
- | Design packages including technology & process design, supply of key equipment, commissioning support & operator training
- | Detailed piping engineering to European standards
- | Turnkey supply of complete process units, e. g. mole sieves

### Delivering maximum value from your investment

Well tried technology for bankable projects

- | Unsurpassed product quality
- | Unrivalled process economics
- | Maximum energy savings

### Sharing our expertise

The premier supplier of bioprocess engineering packages

- | Hands-on experience with a wide range of starch and sugar containing substrates
- | Reliable, efficient and sustainable designs
- | Ongoing research effort

## We make biotechnology work
